Founded in 2004, Affiliated Monitors, Inc. ("AMI") was the first company in the United States to focus on providing independent integrity monitoring and assessment services across a wide range of regulated industries and professions. We have handled over 850 matters for U.S. and international corporations involving government contractors, nonprofits, wholesale and retail establishments, small-to-large businesses, and individual licensed professionals.

AMI helps companies facing ethics and compliance challenges that may put them at risk for suspension, debarment, fines or reputational damage. With increasing scrutiny by government regulators, many businesses and their attorneys know that a strong, values-based ethics program can reduce the possibility of costly mistakes.

independence: Providing objective, third-party perspectives on ethics and compliance programs, ethical cultures, internal processes and controls

integrity: AMI is a trusted resource for professionals, companies' legal counsel, and government agencies

experience: Drawing on years of work in government, ethics, law enforcement, compliance, and risk management

mission: Bringing integrity to the monitoring process to help companies strengthen their ethical cultures and compliance activities and demonstrate corporate responsibility to government oversight agencies

Assessing and Demonstrating Corporate Due Diligence

Businesses engage AMI:

- **Proactively** - to determine the strength of an ethics and compliance program, identify areas of risk, and demonstrate corporate due diligence.
- **By Agreement** - when a deferred prosecution, non-prosecution, or settlement agreement requires ongoing integrity or compliance monitoring.
- **Under a Corrective Action Plan** - for independent review of an ethics and compliance program, internal controls, and ethical culture.

Benefits of Independent Monitoring

- Allowing businesses to continue normal operations while remediating identified problems
- Providing objective feedback and making clear, effective recommendations for improvement
- Increasing public confidence in regulated companies

Compliance Expertise

AMI has been the integrity monitor in matters ranging from large multi-national companies to solo practices. In addition to work throughout the U.S., we have served clients in Europe, the Middle East, Asia, Africa and South America. Government agencies rely on AMI's independence; we do not represent clients or engage in other business activities that could create a conflict of interest.

The Independent Monitoring and Assessment Experts

Meet some of AMI's team members, who represent a variety of backgrounds and talents, and a singular commitment to the value of independent assessment and monitoring.
